**What are the
key features of
this product?**

This is a variable rate mortgage product which means monthly payments can go up or down during the term of the discount period. This is different to a fixed rate product. The rate of interest is linked to the Society's Standard Variable Rate (SVR) for mortgages. During the first 5 years, the interest rate charged will be 2.61% below the Society's SVR - this is the discount period and rate.

The lowest interest rate you might pay during this period will be 2.50% which is called the "floored" rate. This means that if the Society's SVR is below 5.11% at any time during the period of the product, you will not benefit from the full rate of discount of 2.61%.

Three months before this product ends, we will contact you with the options available. If you do nothing at the end of the product period, you will move to the Society's SVR which may mean your payments increase.

This product is available on:

- An Interest-Only repayment basis. This means that your monthly repayments will only pay back the interest on your initial loan amount. The capital balance will not reduce.

This product is available for properties in England and Wales.

There is a no fee payable for setting up this mortgage.

This product is suitable for existing loans of at least £10,000 outstanding at the date of the product switch.

This product is suitable for existing loans with a term of at least 5 years remaining at the date of the product switch.

This product does not require a revaluation of your property or a credit or affordability assessment to be completed.

This product requires all borrowers to be at least 55 at date of application.

This product has no maximum age for borrowers.

This product will not require a full repayment until either the property is permanently vacated or the date of death of the final surviving owner.
